

TAP *The Possibilities*

Stevens Stompers®

Stevens Stompers® Taps work on many different styles of shoes. Buck Taps® have a flange, which comes up partially over the toe of the shoe. The flange helps protect the toe and is used in steps like "Around the World" step. Buck Taps® may also be used for Toe Stands BUT ONLY WHEN INSTALLED ON SPLIT SOLE SHOES.

BUCK

REGULAR

Dance sneakers (see picture left) and some other shoe styles do not have a toe contour which allows for installation of Buck Taps®.

For such styles, we offer Regular Taps. These fit entirely under the shoe and may be set back when shoe toe contour demands.

Regular Taps may also be used on any shoe which will accept a Buck Tap. Please keep in mind, that when we install regular taps on some shoe styles they may not be exchangeable or returnable.
